

SWIM Series – Shallow Water Immersion

The SWIM Series has been created to answer the most demanding need for marine use down to 300 meters/1,000 feet depth.

- Reliable in shallow water** ■ Perfect watertightness even at low pressure
Sealing security thanks to 2 O-rings at coupling interface
Overmolded cable termination
- High performance** ■ High value PEEK thermoplastic
Down to 300 meters
No cathodic delamination and corrosion
Light weight materials
- Cost effective** ■ The cost effective and reliable solution for shallow water immersion
- Versatile** ■ Removable inserts
Interchangeable inserts

Technical features

Materials

- **Housing:**
Thermoplastic (Peek®)
- **Insulator:**
Nylatron® (PA 6/6 + MoS2)
- **Contacts:**
Gold over Nickel plated brass solder cup contacts

Environmental

- **Operating temperature range:**
From -20°C to +70°C
- **Watertightness:**
30 bar mated or unmated (430PSI)

Electrical

Voltage category	SOURIAU recommended service voltage (Vrms 50Hz)	Dielectric withstanding voltage (Vrms 50Hz)
Service 0	350	1,000
Service 1	600	1,500
Service 2	1,000	2,300

- **Insulation resistance:**
 - Unmated connectors: $\geq 10^4$ M Ω
 - Mated connectors: $\geq 5 \times 10^3$ M Ω at 500Vcc

- **Current rating and contact resistance:**

Shell size	Contacts size	Current rating per contact(A)	Contact Resistance (m Ω)
10PL 14PL	20	7	≤ 4
	16	14	≤ 3
	14	20	≤ 2.5
	12	26	≤ 2
	6	65	≤ 1
10PL	2	115	≤ 0.6
	Coaxial 50 Ω	20	7
	Coaxial 75 Ω	7	≤ 4

Connector part numbers

Shell type: FED: Straight plug RER: Jam-nut receptacle	FED	M	14PL	N	0720	SAY
Type of contact: M: Pin contacts F: Socket contacts						
Shell size: 10PL or 14 PL						
Insert Material: N: PA66+MoS2 (Nylatron®)						
Contact layouts: See contact layout designation p.5						
Cable clamp set: SAY: Overmolded cable termination (Only for FED plugs)						

Pressure sealing caps part numbers

Cap type: BER: Cap for receptacles BEF: Cap for plugs	BER	C	10PL
Cord set: C: With cord -: Without cord (no mention)			
Shell size: 10PL or 14 PL			

Insert sub assemblies part numbers (mounted contacts)

Insert + contact	BIS	14PL	N	04 12	M
Shell size: 10PL or 14 PL					
Insert material: N: Nylatron®					
Contact layouts: See contact layout designation p.5					
Type of contact: M: Pin contacts F: Socket contacts					

Shell sub assemblies part numbers

Shell type: CFE: Plug CRER: Receptacle	CFE	14PL	SAY
Shell size: 10PL or 14 PL			
Cable termination: SAY: Overmolded cable termination (Only for FED plugs)			

Ordering information

O-ring type	10PL	14PL
❶ Panel O-ring (for REC-RER)	10-01	14-01
❷ Insulator/shell O-ring	10-02	14-02
❸ Taper seat O-rings	10-03	14-03

Dimensions

FED – Straight plug

Shell size	10PL	14PL
Ø A max	25.9	34
Ø B	17.8	24
Ø C max	18.75	25
Ø D	18.75	25.75
E max	52.5	52.5
F	20	20
G min	5	5
Ø H	15	22

Maximum outer cable diameter = ØH (depending on the fluidity of the compound)

RER – Jam-nut receptacle

Shell size	10PL	14PL
A	22	30
B	16	23
C	37	37
D	14	14
Ø E	24	33
F	4	5
Ø G (ACME)	M22 x 2.54	M30 x 2.54
Ø H	26	34
Ø I	18.2	25.5
J	16.2	23.2
Ø K min	25	34
L min	4	4
L max	9	9

Note: All dimensions are in millimeters.

Dimensions

BEF/BER – Pressure sealing caps

Shell size	10PL	14PL
A	40	40
Ø B max	25.9	34
C max	37.5	37.5
Ø D max	25.9	34
Ø E	4.2	4.2

Mated/Unmated connectors

Shell size	10PL	14PL
A	55.5	55.5
B	19.5	19.5

Note: All dimensions are in millimeters.

Product range extension

TP Series

- Nickel plated brass connector
- Shallow water
- Temporary immersion

U Series

- Stainless steel connector
- High depth
- Long immersion

M Series

- Marine Bronze connector
- High depth
- Long immersion

8810 Series

- Marine Bronze connector
- High depth
- Long immersion
- Underwater mateable
