D-Line® Connectors

ABOUT AXON'

Headquartered in the beautiful Champagne region of France, AXON' is a worldwide leader in specialist interconnect. The company excels in the design and manufacture of wires, cables, terminated harnesses and interconnect solutions for high technology applications.

With numerous manufacturing sites across Europe, North America and Asia and a comprehensive range of quality approvals, AXON' is able to locally design and build a world beating range of microminiature interconnect solutions tailored to your specific needs.

As a specialist in advanced interconnect solutions, AXON' CABLE has extensive experience in micro-miniature solutions based on the highly reliable Twist Pin contact technology, including:

- Pigtail and PCB connectors, metal or plastic bodies, regular or low profile versions.
- Solder cup connectors: metal or plastic bodies, regular or low profile.
- QPL qualified Micro-D to MIL-DTL-83513
- Micro-strip and saver connectors
- Combo Micro-D connectors: making it possible to put higher power or RF signals through Micro-D connectors.
- Hermetic connectors, typically used in the oil and gas industry, defence and scientific research.
- Non-magnetic connectors for oil and gas, scientific research, space and medical electronics.
- Nano-D connectors (0.635 mm contact spacing) for extreme miniaturization.
- Micro-D and Nano-D connectors specifically designed for space applications.
- Micro-D circular connectors.

MICRO-D: WEIGHT SAVING & ROBUSTNESS

By its very design, the **Micro-D** connector system meets all the requirements of robustness, durability, low contact resistance, high current, dielectric strength, shock and vibration. With **1.27 mm (.050") contact spacing**, Micro-D connectors, half the size of D-sub connectors, represent an excellent solution for saving both space and weight. In addition to a complete range of **QPL** qualified Micro-D connectors to **MIL-DTL-83513**, AXON' also offers Micro-D PCB connectors and cable assemblies in both metal and plastic bodied versions.

With its many possible configurations, Micro-D technology is perfectly suited to a multitude of systems where weight, miniaturization or signal transmission integrity is paramount: applications benefiting from this technology include everything from missiles and their guidance systems, through oil well drilling tools to medical devices, satellites and scientific research. For very specific applications such as medical MRI scanners or low magnetic field detection systems, AXON' has developed a range of **non-magnetic** connectors using new materials and surface treatments, avoiding ferromagnetic materials. **Hermetic** connectors are also offered for applications where an enclosure needs to be fully sealed from the outside world.

▲ CLEAN ROOM

& assemblies

NANO-D: EXTREME MINIATURIZATION

In addition to circular and rectangular Micro-D connectors and assemblies, AXON' CABLE offers **Nano-D** connectors and jumpers based on the highly reliable Twist Pin contact technology. This is the connector of choice for any application requiring extreme miniaturization combined with high reliability, and is used in a variety of fields from military and medical devices to oil and gas exploration. Nanominiature connectors are based on the Nano-D technology with **0.635 mm (.025") contact spacing** and nanominiature shells. The performance of AXON's Nano-D is fully compliant to the MIL-DTL-32139 specification, giving a guarantee of interchangeability and intermateability between suppliers.

MINIATURE CONNECTORS FOR SPACE

AXON' CABLE has developed a range of Micro-D connectors suitable for the challenging requirements of on-board electronics in Space. The **Space Micro-D** range benefits from the expertise in the AXON' MIL-DTL-83513 D-shape connectors. Small, lightweight and reliable, AXON's Space Micro-D connectors are approved to **ESCC 3401/029 EPPL2**. In order to meet the necessarily high levels of quality and reliability they are produced with increased plating protection and manufactured in class 100 000 clean rooms. For extreme miniaturization in Space, AXON' also offers ESCC3401/086 EPPL2 approved **Space Nano-D** connectors.

ISO 14001

TS 16949

OHSAS 18001

CIRCULAR MICRO-D: SMALL AND EASY TO USE

The **Circular Micro-D Connector** range benefits from the expertise in the AXON' D-Line® **MIL-DTL-83513** D-shape connectors and features **easy-to-use** connect and disconnect functionality. The MIL-DTL-83513 standard dictates the design and performance for Micro-D connectors. These small connectors meet the requirements of the most demanding applications and harsh environments. Military equipment, research centres and on-board electronics are just a few examples. Despite their high pin density, small size and lightweight bodies, the AXON' miniature circular connectors offer similar performances to their rectangular Micro-D cousins.

The standard range of Circular Micro-D connectors consists of 5 basic types:

- Metric thread connectors - MCA.T.
- Three lug bayonet connectors - MCA3B.
- Triple start connectors (with anti-decoupling) - MCAC.
- Breakaway connectors - MCABK.
- Plastic shells - MCA.

AXON' also offers PCB connectors designed for out 4 types of metal shell connectors.

TWIST PIN CONTACT

At the heart of the AXON' Micro-D connector is the **Twist Pin contact** which by its design and performance enables the system to meet the most severe requirements - often significantly more so than stipulated in the MIL-DTL-83513 standard. It must be stated that even if meeting the standard, not all Micro-D contacts will behave in the same way when subjected to certain specific requirements. This is not the case for AXON's 100% vision inspected Twist Pin contact.

EXPERTISE IN CABLING AND ASSEMBLIES

AXON' CABLE specializes in the design and manufacture of custom designed **assemblies, interconnect systems** and complex **harnesses** often integrating several branches. The company has brought its expertise in the manufacture of precision conductors, wires, cables, cable assemblies and connectors together with its knowledge of overmoulding techniques and EMI protection to be able to offer optimally engineered solutions for the most challenging requirements.

TWIST PIN CONTACT TECHNOLOGY

The male Micro-D contact is made up of 10 strands of beryllium-copper and copper alloy twisted together, welded then bumped. These sprung strands are in fact compressed during insertion into the turned female contact and therefore a high number of electrical contact points is permanently assured, while retaining flexibility and ease of insertion/ extraction.

The plating of these contacts is a minimum of 1.27 microns of gold in accordance with MIL-G-45204 type 2, class 1, and this gives additional operational security. Furthermore, the Twist Pin contact is auto-guided into its female contact, even if it is not centred in its recess.

As with all contacts conforming to MIL-DTL-83513, the AXON' Micro-D contacts accept as standard 24, 26, 28 and 30 AWG wires. In order to meet specific customer requests, AXON' can also offer solutions for large section wires up to 22 AWG and for miniature wires as small as 36 AWG.

▲ TWIST PIN CONTACTS

► Twist pin performance versus MIL-DTL-83513 specification

CHARACTERISTIC	AXON' TWIST PIN	MIL REQUIREMENT
NUMBER OF CONTACT POINTS WITH FEMALE CONTACT	7	No requirement
CONTACT RESISTANCE (FOLLOWING TEST §3.5.6)	Max 3 mΩ (under 3 A)	8 mΩ (under 2.5 A)
VIBRATION (NO DISCONTINUITY > 1 μs)	200 g*	20 g*
SHOCK (NO DISCONTINUITY > 1 μs)	500 g*	50 g*
CRIMPING	22 to 36 AWG	24 to 26 AWG

*: Vibration & shock values depending on test profiles.

► Before insertion

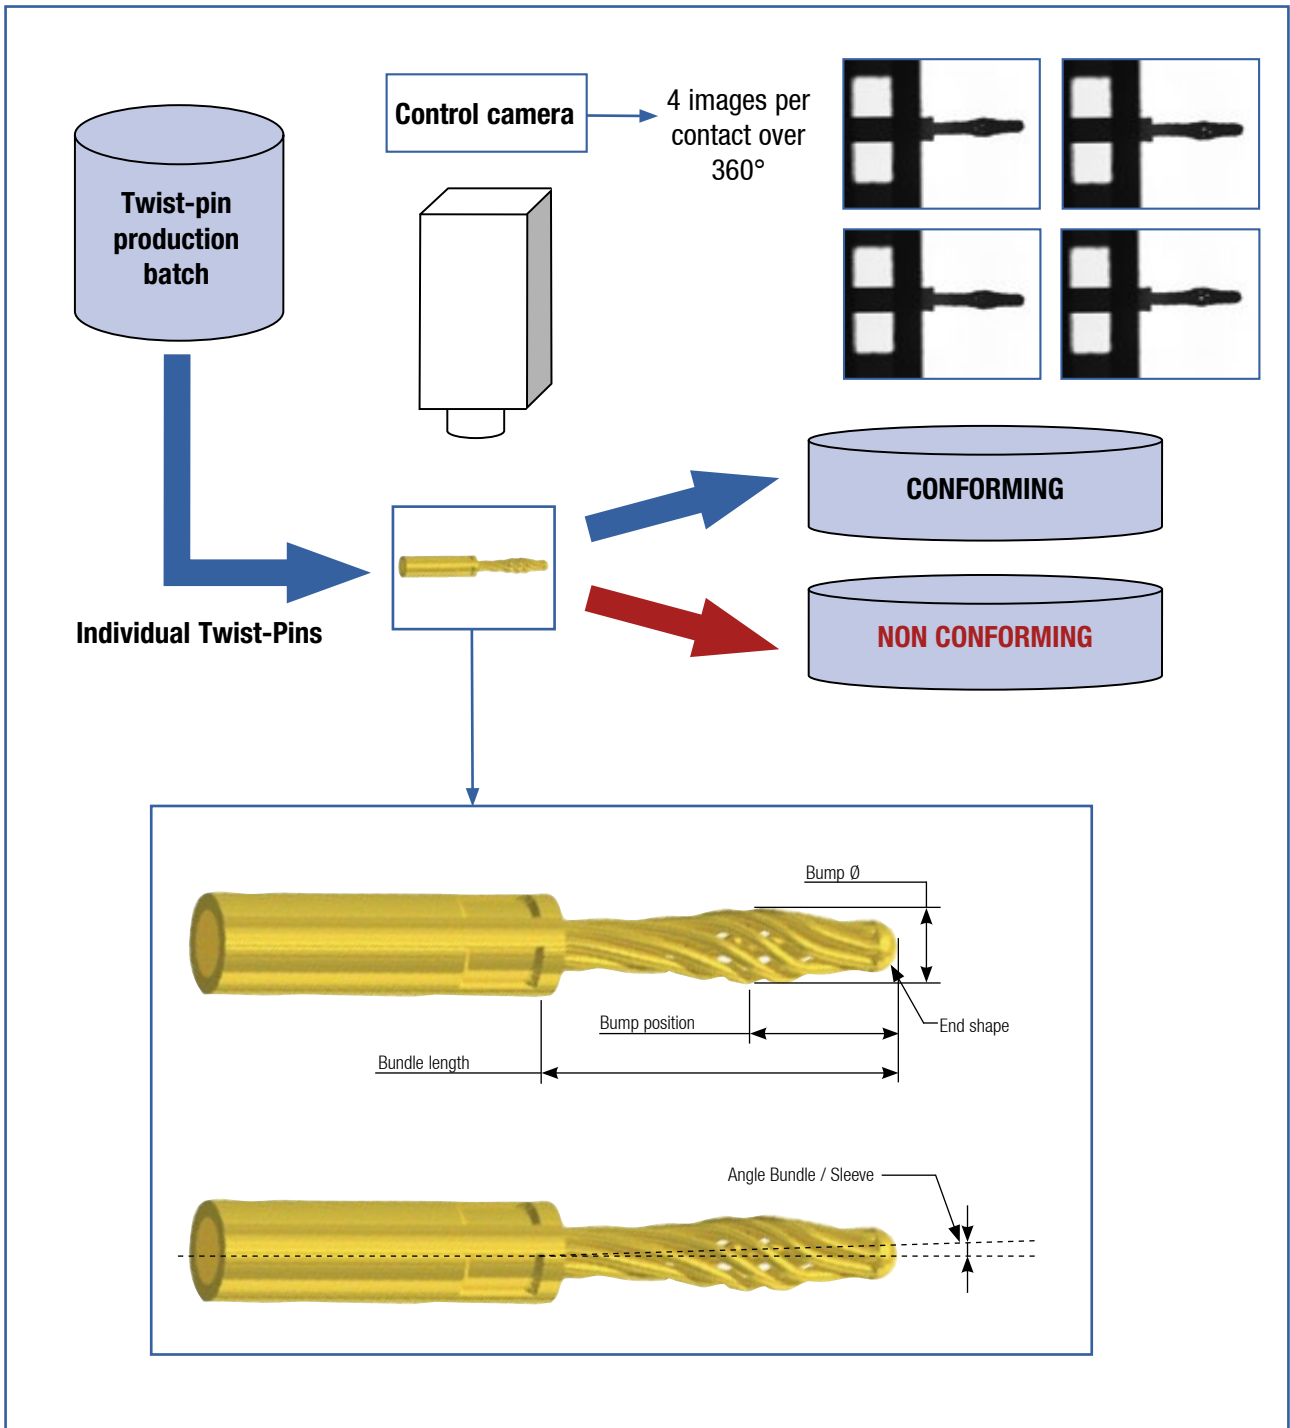

► After insertion

► Quality innovation:
100% vision inspection of twist-pin contacts.

To ensure consistently high quality levels, AXON' carry out 100% automatic vision inspection of the shape and dimensions of every twist-pin produced.

TEST & INSPECTION

▶ Micro-D components

▶ METAL SHELLS

- Dimensions measured with non-contact optical equipment.
- Plating thickness measured with X-ray spectrometer.

▶ PLASTIC COMPONENTS

(shells, inserts, trays for PCB connectors,...).

- Dimensions measured with non-contact optical equipment.

▶ CONTACTS

- Dimensions 100% controlled by precision automated vision inspection, see page 13.
- Plating thickness measured with X-ray spectrometer.
- Insertion and retention forces.
- Electrical resistance of mated contacts.

▲ PRECISION AUTOMATED VISION INSPECTION

▲ EXAMPLE OF CONTACT INSPECTION

▶ Micro-D assemblies

AXON' carries out electrical tests on all the manufactured Micro-D harnesses and connectors.

▶ TYPICAL TESTS

FOR MICRO-D HARNESSSES	FOR MICRO-D PCB CONNECTORS
<ul style="list-style-type: none"> - continuity. - insulation resistance. 	<ul style="list-style-type: none"> - contact resistance. - insulation resistance. - dielectric strength.

If requested by the customer for special products, AXON' can carry out other tests such as:

- Transfer impedance Z_T for shielded harnesses.
- Insertion and return loss for Micro-D with coaxial contacts.
- Attenuation plots for filtered products.
- Waterproofness tests.
- X-ray inspection.
- Mating and de-mating tests.
- And other specific tests as required.

AXON' carries out sample inspection for visual and dimensional criteria. The goods are delivered with:

- a Certificate Of Compliance.
- a test report (on request).

AXON' maintains batch traceability records for 10 years (or more if required). In order to guarantee a high quality level for each product, AXON' uses a wide variety of production tools, systems, machines and jigs. These include optimized line design, poka yoke, standardized operations and TPM (Total Productive Maintenance).

Micro-D connectors

GLOSSARY OF TERMS

- JACKSCREW 1 High or low profile, hexagonal socket or slotted head.
- SHELL 2 Connector metal body.
- JACKPOST 3 Mates with jackscrew.
- TWIST PIN 4 Male contact, fitted to plug connector.
- INSERT 5 Moulded insulation housing, separating each connection.
- INTERFACIAL SEAL 6 Fitted to socket connector only.
- SOCKET 7 Female contact, fitted to socket connector (also known as socket).
- TRAY 8 Junction box used for PCB connectors only.

- Standard connector ● Manufactured to the standard dimensions and specifications.
- Special connector ● A standard connector modified to meet specific requirements.
- Custom made connector ● Designed to meet specific customer requirements.
- Connector saver ● Used to reduce wear and tear on equipment and systems while testing.
- BR connector ● Board Right Angle connector.
- CBR connector ● Condensed Board Right Angle connector.
- BS connector ● Board Straight connector.
- Strip connector ● Single row plastic connector with 1.27 mm spacing (.050").
- Pigtail connector ● Connector with insulated or uninsulated wires.
- Cord ● Cable harness with 2 connectors only.
- Jumper/ Extension cord ● Cord with 1 plug and 1 receptacle connector of the same number of ways.
- Harness ● Multi-branched cable assembly.
- LCP ● Liquid Crystal Polymer.
- Potting ● Epoxy compound used as an encapsulant.
- Solder cup connector ● Connector with solder type contacts, usually used for prototyping.

METAL CONNECTORS ARE SUPPLIED WITH ANTI-STATIC PROTECTIVE DUST CAPS

CONNECTOR MATING GUIDE

- ▶ **1-** Align both connectors and start to insert the male D-shape into the female one.

- ▶ **2-** Screw each jackscrew down alternately by no more than approximately one turn. This is essential to ensure correct mating.

- ▶ **3-** Tighten both jackscrews to the recommended torque values set out below.

- ▶ **RECOMMENDED TORQUE VALUES**

- Micro-D 9 to 69 way jackscrew: 0,28 N.m / 2.5 inch-pounds.
- Micro-D 100 way jackscrew: 0,51 N.m / 4.5 inch-pounds.
- Micro-D PCB mounting screws (inside threaded inserts):
9 to 69 way with 2-56 UNC 2A screws: 0.14 N.m / 1.25 inch-pounds
100 way with 4-40 UNC 2A screws: 0.34 N.m / 3 inch-pounds
- Nano-D 9 to 51 way jackscrew: 0,11 N.m / 1 inch-pounds.

Micro-D connectors

GENERAL CHARACTERISTICS

per MIL-DTL-83513*

AXON's range of Micro-D connectors which is covered by the MIL-DTL-83513* standard, is ideally suited to equipment and applications where weight, miniaturisation and long term performance are required. It is available:

- in 10 contact arrangements (9 to 100 contacts) for rectangular Micro-D connectors,
- and 2 to 40 contacts for microstrips.

► Electrical & mechanical characteristics

CHARACTERISTIC	SPECIFICATION	TEST METHOD
CURRENT RATING	3 A max.	EIA-364-70
CONTACT RESISTANCE	8 mΩ max.	EIA-364-06
INSULATION RESISTANCE	5000 MΩ min. @ 500 Vdc	EIA-364-21
DIELECTRIC WITHSTANDING VOLTAGE - SEA LEVEL 0 m - ALTITUDE 21 km (70,000 ft)	600 V _{Ac} 150 V _{Ac}	EIA-364-20
CONTACT ENGAGING AND SEPARATION FORCE	170 g max. (6 oz) 14 g min. (0.5 oz)	EIA-364-37
CONNECTOR MATING AND DE-MATING FORCE	283 g (10 oz) x number of contacts max.	EIA-364-13
CONTACT RETENTION	2.26 kg (5 lbs) for 5 seconds min.	EIA-364-29
DURABILITY	500 mating cycles min.	EIA-364-09
TEMPERATURE RANGES - STANDARD - HIGH TEMP	-55°C / +150°C -55°C / +200°C	
VIBRATION	20 g's - No discontinuity >1μs	EIA-364-28 - TEST CONDITION IV
SHOCK	50 g's - No discontinuity >1μs	EIA-364-27 - TEST CONDITION E
SALT SPRAY	48 hours	EIA-364-26 - TEST CONDITION B
HUMIDITY	Insulation resistance > 1MΩ	EIA-364-31 - METHOD IV

REACH & RoHS COMPLIANCE

▶ RoHS compliance

AXON' CABLE has been pro-actively implementing measures for many years to ensure compliance with the European Directive 2011/65/EU which came into force on 21st July 2011. The Directive prohibits the use of Hazardous Substances such as lead, mercury, hexavalent chromium, cadmium, bromine compounds (PBB and PBDE) and various phthalates. It relates to all components of products which are used in the manufacture of electrical and electronic equipment.

As a cable and connector manufacturer, AXON' has taken actions to ensure compliance with directive 2000/53/EC applicable since 21st October 2000.

COMPONENT SPECIFIC RoHS COMPLIANCE

COMPONENT	MATERIAL	FINISH	RoHS STATUS
PIN CONTACT (TWIST PIN)	COPPER + BERYLLIUM COPPER	GOLD	RoHS Compliant
SOCKET CONTACT	COPPER ALLOY	GOLD	RoHS Compliant
PLASTIC SHELL	LIQUID CRYSTAL POLYMER	N/A	RoHS Compliant

	EPOXY RESIN 200°C VERSION	N/A	RoHS Compliant

▶ Application of REACH

The new EU regulation on the Registration, Evaluation, Authorisation and restriction of Chemicals (REACH) came into force in June 2007. The regulation concerns the authorised use of chemicals. It requires manufacturers and importers to register substances and their use with the European Chemical Agency (ECHA).

AXON' CABLE is known as a "downstream user" with respect to the REACH regulation, and a manufacturer of "Articles". AXON' CABLE products are not intended to release any undesired substance under normal and reasonable operations of use.

To this day AXON' CABLE have not identified any component containing any SVHC in their product range.

NOTES

1 - NOMINAL WEIGHT SHOWN. ADD 10% FOR MAXIMUM WEIGHT.

2 - SOLDER CUPS: CONNECTOR WEIGHT DOES NOT INCLUDE THE HARDWARE WEIGHT.

3 - PIGTAILS: CONNECTOR WEIGHT DOES NOT INCLUDE HARDWARE AND WIRE WEIGHTS. SEE TABLE PAGE 29 FOR WIRE WEIGHT CALCULATION.

4 - PCB CONNECTORS: NOMINAL WEIGHT INCLUDES THE HARDWARE WEIGHT.

WIRE CODES

Nominal dimensions are used throughout this chapter.

► Solid uninsulated wires

WIRE CODE	WEIGHT (g/m)	MATERIAL	AWG	CONSTRUCTION mm (inch)	Ø mm (inch)	AREA mm ² (sq in)	RESISTANCE Ω/100m (Ω/ 1000 ft)
G	1.45	GOLD PLATED COPPER	25	1x0.455 1x.018	0.455 .018	0.163 .000252	11 33.5
T	1.81	TIN PLATED COPPER	24	1x0.510 1x.0201	0.510 .0201	0.205 .000317	9 27.4
T (FOR PCB)	1.81	GOLD PLATED COPPER AND TIN LEAD-FREE (97% TIN MAX.)	24	1x0.510 1x.0201	0.510 .0201	0.205 .000317	11 33.5
D (FOR PCB)	1.45	FLASH GOLD PLATED COPPER	25	1x0.455 1x.018	0.455 .018	0.163 .000252	11 33.5

OTHER WIRE TYPES AVAILABLE ON REQUEST

Micro-D connectors

COLOUR CODES

► Colour codes F and L

All the wires have the same colour.
Available with all wire types.

COLOUR CODE	COLOUR
F	YELLOW
L	WHITE

OTHER COLOURS AVAILABLE ON REQUEST.

► Colour code W

Also called 10 colour repeat (10 colours repeated in sequence)
as per MIL-DTL-83513. Available with all wire types.

PIN NUMBER	MIL-STD-681 NUMBER	COLOUR
1	0	BLACK
2	1	BROWN
3	2	RED
4	3	ORANGE
5	4	YELLOW
6	5	GREEN

20	9	WHITE
21	0	BLACK

► Colour code V

Only available with 2607 AWG wires (Micro-D wire code F) and 2619 AWG wires (Micro-D wire code 3).

Colours and coloured stripes as per MIL-STD-681 system (except the appropriate colour code is the contact number minus 1).

Only available for Micro-D connectors with 51 contacts or less.

SUMMARY OF CHARACTERISTICS

ELECTRICAL & MECHANICAL PERFORMANCE	
CURRENT RATING	3 A max.
CONTACT RESISTANCE	8 mΩ max.
INSULATION RESISTANCE	5000 MΩ min. @ 500 Vdc
DIELECTRIC WITHSTANDING VOLTAGE	Sea Level: 600 V _{AC} Altitude 21 km (70,000 ft): 150 V _{AC}
CONTACT ENGAGING FORCE	170 g max. (6 oz)
CONTACT SEPARATING FORCE	14 g min. (0.5 oz)
CONTACT RETENTION	2.26 kg (5 lbs)
DURABILITY	500 mating cycles min.
VIBRATION	20g's – No discontinuity > 1 μs
SHOCK	50g's – No discontinuity > 1 μs

MATERIAL & FINISH	
SHELL	Aluminium alloy 6061 or 300 series stainless steel, see ordering info for plating options
MOULDED INSULATOR	Liquid Crystal Polymer (LCP)
INTERFACIAL SEAL	Fluorosilicone rubber
PIN CONTACT	Copper and beryllium copper, gold over nickel plating
SOCKET CONTACT	Copper alloy, gold over nickel plating
SOLDER CUP	Copper alloy, gold over nickel plating
ENCAPSULANT	Epoxy resin

SUMMARY OF CHARACTERISTICS

ELECTRICAL & MECHANICAL PERFORMANCE	
CURRENT RATING	3 A max.
CONTACT RESISTANCE	8 m Ω max.
INSULATION RESISTANCE	5000 M Ω min. @ 500 V _{dc}
DIELECTRIC WITHSTANDING VOLTAGE	Sea level: 600 V _{ac} Altitude 21 km (70,000 ft): 150 V _{ac}
CONTACT ENGAGING FORCE	170 g max. (6 oz)
CONTACT SEPARATING FORCE	14 g min. (0.5 oz)
CONTACT RETENTION	2.26 kg (5 lbs)
DURABILITY	500 Mating cycles min.
VIBRATION	20g's – No discontinuity > 1 μ s
SHOCK	50g's – No discontinuity > 1 μ s

MATERIAL & FINISH	
SHELL	Aluminium alloy 6061 or 300 Series stainless steel, see ordering info for plating options
MOULDED INSULATOR	Liquid Crystal Polymer (LCP)
INTERFACIAL SEAL	Fluorosilicone rubber
PIN CONTACT	Copper and beryllium copper, gold over nickel plating
SOCKET CONTACT	Copper alloy, gold over nickel plating
ENCAPSULANT	Epoxy resin

SUMMARY OF CHARACTERISTICS

ELECTRICAL & MECHANICAL PERFORMANCE	
CURRENT RATING	3 A max.
CONTACT RESISTANCE	8 mΩ max.
INSULATION RESISTANCE	5000 MΩ min. @ 500 V _{dc}
DIELECTRIC WITHSTANDING VOLTAGE	Sea level: 600 V _{ac} Altitude 21 km (70,000 ft): 150 V _{ac}
CONTACT ENGAGING FORCE	170 g max. (6 oz)
CONTACT SEPARATING FORCE	14 g min. (0.5 oz)
CONTACT RETENTION	2.26 kg (5 lbs)
DURABILITY	500 mating cycles min.
VIBRATION	20g's – No discontinuity > 1 μs
SHOCK	50g's – No discontinuity > 1 μs

MATERIAL & FINISH	
SHELL	Aluminium Alloy 6061 or 300 series stainless steel, see ordering info for plating options
MOULDED INSULATOR	Liquid Crystal Polymer (LCP)
INTERFACIAL SEAL	Fluorosilicone rubber
PIN CONTACT	Copper and beryllium copper, gold over nickel plating
SOCKET CONTACT	Copper alloy, gold over nickel plating
ENCAPSULANT	Epoxy resin
MOULDED TRAY	Liquid Crystal Polymer (LCP)
PCB TERMINALS	AWG24 gold plated copper, solder dipped in 63/37 tin-lead
HARDWARE	300 series stainless steel, passivated

PCB CONNECTOR

STRAIGHT 0.100" PITCH

METAL SHELL

- Only available in metal shell version.
- Environmentally sealed.
- Board straight connector for flexible and rigid printed circuit boards.
- Several tail lengths available.

CAGE CODE: OK0J2

IDENTIFICATION CODE

M83513/

26-G

03

N

P

SERIES

M83513/: QPL series.

TYPE

- 22-A**: Pin connector, metal shell, 9 contacts.
- 22-B**: Pin connector, metal shell, 15 contacts.
- 22-C**: Pin connector, metal shell, 21 contacts.
- 22-D**: Pin connector, metal shell, 25 contacts.
- 22-E**: Pin connector, metal shell, 31 contacts.
- 22-F**: Pin connector, metal shell, 37 contacts.
- 23-G**: Pin connector, metal shell, 51 contacts.
- 24-H**: Pin connector, metal shell, 100 contacts.
- 25-A**: Socket connector, metal shell, 9 contacts.
- 25-B**: Socket connector, metal shell, 15 contacts.
- 25-C**: Socket connector, metal shell, 21 contacts.
- 25-D**: Socket connector, metal shell, 25 contacts.
- 25-E**: Socket connector, metal shell, 31 contacts.
- 25-F**: Socket connector, metal shell, 37 contacts.
- 26-G**: Socket connector, metal shell, 51 contacts.
- 27-H**: Socket connector, metal shell, 100 contacts.

See pages 26 & 27 for contact arrangements.

TERMINATION LENGTH

01: 2.77 mm (.109").

02: 3.56 mm (.140").

03: 4.37 mm (.172").

Tolerance ± 0.38 mm (.015").

SHELL FINISH

C: Cadmium plating.

N: Nickel plating.

P: Passivated stainless steel.

HARDWARE CODE

N: No jackpost or threaded insert.

P: Jackpost installed.

T: Threaded inserts installed for 22-A to 23-G and 25-A to 26-G only.

W: Jackpost and threaded inserts installed for 22-A to 23-G and 25-A to 26-G only.

U: Threaded inserts installed. For 24-H and 27-H only.

Y: Jackpost and threaded inserts installed. For 24-H and 27-H only.

METAL CONNECTORS ARE SUPPLIED WITH ANTI-STATIC PROTECTIVE DUST CAPS

DIMENSIONS

Dimensions are in millimetres (inches).

RECTANGULAR CONNECTORS

PIGTAIL CONNECTOR

METAL SHELL

- High performance metal connector and PTFE wire.
- Environmentally sealed.
- Operating temperature: 150°C or 200°C.
- 9 to 100 contacts.

IDENTIFICATION CODE

MDA 2 51 S 4 L 050 B

SERIES

MDA: Micro-D AXON' standard series.

CONNECTOR TYPE

- 1:** Cadmium al. shell / **Z:** Black zinc nickel aluminium shell + potting 150°C.
2: Nickel aluminium shell + potting 150°C.
3: Nickel aluminium shell + potting 200°C.
S: Passivated stainless steel shell + potting 200°C.

NUMBER OF CONTACTS **09, 15, 21, 25, 31, 37, 51DR, 51, 69, 100.**
 See pages 26 & 27 for contact arrangements.

CONNECTOR GENDER

- P:** Male (pin contacts).
S: Female (socket contacts).

WIRE TYPE

- For colour codes **F, L, W**
1: E 2607, AWG 26, 7 strands, 600V.
4: E 2619, AWG 26, 19 strands, 600V.
6: E 2807, AWG 28, 7 strands, 600V.
8: E 3007, AWG 30, 7 strands, 600V.
A: E 2407, AWG 24, 7 strands, 600V.
C: E 2419, AWG 24, 19 strands, 600V.
E: M22759/33, AWG 26, 19 strands, 600V.
- For colour code **V** only
3: M22759/11, AWG26, 19 strands, 600V.
F: E2607, AWG26, 7 strands, 600V.
- Solid uninsulated wires
G: AWG 25 gold plated.
T: AWG 24 tin plated.
 See page 29 for wire types.

COLOUR CODE

- F:** All yellow.
L: All white.
BLANK: If wire type is G or T.
W: 10 colour repeat.
V: MIL-STD-681 striped (only for wire types 3 and F).
 See page 30 for colour code.

WIRE LENGTH (in cm)

Attention! Wire length in centimetres - (1cm = 10mm = 0.394").

L	L ≤ 10	10 < L ≤ 100	L > 100
in cm (inches)	L ≤ 3.940	3.940 < L ≤ 39.40	L > 39.40
TOLERANCE	-0 / +0.5	-0 / +3	-0 / +5
in cm (inches)	-0 / +0.200	-0 / +1.180	-0 / +1.970

HARDWARE

- B:** No hardware.
C: U-clips with low profile hex socket head jackscrews (removable).
D: U-clips with low profile slot head jackscrews (removable).
M: Low profile hex socket head jackscrews (removable).
N: High profile hex socket head jackscrews (removable).
S: Low profile slot head jackscrews (removable).
T: High profile slot head jackscrews (removable).
P: Jackposts (removable).
Px (x: 1 to 5): Panel mount jackposts.
K: High profile slot head jackscrews (non removable).
L: Low profile hex socket head jackscrews (non removable).
F: Float mount, front panel mount (non removable).
FR: Float mount, rear panel mount (non removable).
 See pages 190 to 200 for hardware description.

SUMMARY OF CHARACTERISTICS

ELECTRICAL & MECHANICAL PERFORMANCE	
CURRENT RATING	3 A max.
CONTACT RESISTANCE	8 mΩ max.
INSULATION RESISTANCE	5000 MΩ min. @ 500 V _{oc}
DIELECTRIC WITHSTANDING VOLTAGE	Sea level: 600 V _{ac}
	Altitude 21 km (70,000 ft): 150 V _{ac}
CONTACT ENGAGING FORCE	170 g max. (6 oz)
CONTACT SEPARATING FORCE	14 g min. (0.5 oz)
CONTACT RETENTION	2.26 kg (5 lbs)
DURABILITY	500 mating cycles min.
VIBRATION	20g's – No discontinuity > 1 μs
SHOCK	50g's – No discontinuity > 1 μs

MATERIAL & FINISH	
SHELL	Aluminium alloy 6061 or 300 series stainless steel, see ordering info for plating options
MOULDED INSULATOR	Liquid Crystal Polymer (LCP)
INTERFACIAL SEAL	Fluorosilicone rubber
PIN CONTACT	Copper and beryllium copper, gold over nickel plating
SOCKET CONTACT	Copper alloy, gold over nickel plating
ENCAPSULANT	Epoxy resin
HARDWARE	300 series stainless steel, passivated

SEE PAGE 24 FOR MORE INFORMATION

RECTANGULAR CONNECTORS

PIGTAIL CONNECTOR

LOW PROFILE METAL SHELL

- High performance metal connector and PTFE wire.
- Operating temperature: 150°C or 200°C.
- 9 to 51 contacts.

IDENTIFICATION CODE

MDA 2 L51 S 4 L 050 B

SERIES

MDA: Micro-D AXON' standard series.

CONNECTOR TYPE

- 1:** Cadmium aluminium shell / **Z:** Black zinc nickel aluminium shell + potting 150°C.
2: Nickel aluminium shell + potting 150°C.
3: Nickel aluminium shell + potting 200°C.
S: Passivated stainless steel shell + potting 200°C.

NUMBER OF CONTACTS L09, L15, L21, L25, L31, L37, L51.

See pages 26 & 27 for contact arrangements.

CONNECTOR GENDER

- P:** Male (pin contacts).
S: Female (socket contacts).

WIRE TYPE

For colour codes F, L, W

- 1:** E 2607, AWG 26, 7 strands, 600V.
4: E 2619, AWG 26, 19 strands, 600V.
6: E 2807, AWG 28, 7 strands, 600V.
8: E 3007, AWG 30, 7 strands, 600V.
A: E 2407, AWG 24, 7 strands, 600V.
C: E 2419, AWG 24, 19 strands, 600V.
E: M22759/33, AWG 26, 19 strands, 600V.

For colour code V only

- 3:** M22759/11, AWG26, 19 strands, 600V.
F: E 2607, AWG 26, 7 strands, 600V.
Solid uninsulated wires
G: AWG 25 gold plated
T: AWG 24 tin plated

See page 29 for wire types.

COLOUR CODE

- F:** All yellow.
L: All white.
BLANK: If wire type is G or T.
W: 10 colour repeat.
V: MIL-STD-681 striped (only for wire types 3 and F).
 See page 30 for colour code.

WIRE LENGTH (in cm)

Attention! Wire length in centimetres - (1cm = 10mm = 0.394").

L	L ≤ 10	10 < L ≤ 100	L > 100
in cm (inches)	L ≤ 3.940	3.940 < L ≤ 39.40	L > 39.40
TOLERANCE	-0 / +0.5	-0 / +3	-0 / +5
in cm (inches)	-0 / +0.200	-0 / +1.180	-0 / +1.970

HARDWARE

- B:** No hardware.
C: U-clips with low profile hex socket head jackscrews (removable).
D: U-clips with low profile slot head jackscrews (removable).
M: Low profile hex socket head jackscrews (removable).
N: High profile hex socket head jackscrews (removable).
S: Low profile slot head jackscrews (removable).
T: High profile slot head jackscrews (removable).
P: Jackposts (removable).
Px (x: 1 to 5): Panel mount jackposts.
K: High profile slot head jackscrews (non removable).
L: Low profile hex socket head jackscrews (non removable).
F: Float mount, front panel mount (non removable).
FR: Float mount, rear panel mount (non removable).
 See pages 190 to 200 for hardware description.

SUMMARY OF CHARACTERISTICS

ELECTRICAL & MECHANICAL PERFORMANCE	
CURRENT RATING	3 A max.
CONTACT RESISTANCE	8 mΩ max.
INSULATION RESISTANCE	5000 MΩ min. @ 500 Vdc
DIELECTRIC WITHSTANDING VOLTAGE	Sea level: 600 Vac
	Altitude 21 km (70,000 ft): 150 Vac
CONTACT ENGAGING FORCE	170 g max. (6 oz)
CONTACT SEPARATING FORCE	14 g min. (0,5 oz)
CONTACT RETENTION	2,26 kg (5 lbs)
DURABILITY	500 mating cycles min.
VIBRATION	20g's - No discontinuity > 1µs
SHOCK	50g's - No discontinuity > 1µs

MATERIAL & FINISH	
MOULDED SHELL	Liquid Crystal Polymer (LCP)
PIN CONTACT	Copper and beryllium copper, gold over nickel plating
SOCKET CONTACT	Copper alloy, gold over nickel plating
SOLDER CUP	Copper alloy, gold over nickel plating
ENCAPSULENT	Epoxy resin
HARDWARE	300 series stainless steel, passivated

SEE PAGE 24 FOR MORE INFORMATION

RECTANGULAR CONNECTORS

SOLDER CUP CONNECTOR

PLASTIC SHELL

- Low cost plastic connector and solder cup contacts.
- Ideal for prototyping or where pigtail type connectors cannot be used.
- Operating temperature: 150°C or 200°C.
- 9 to 51 contacts.

IDENTIFICATION CODE

MDA P 51 S FS B

SERIES

MDA: Micro-D AXON' standard series.

CONNECTOR TYPE

P: LCP shell + potting 150°C.
L: LCP shell + potting 200°C.

NUMBER OF CONTACTS

09, 15, 21, 25, 31, 37, 51.
See pages 26 & 27 for contact arrangements.

CONNECTOR GENDER

P: Male (pin contacts).
S: Female (socket contacts).

SOLDER CUP

HARDWARE

- B:** No hardware.
 - C:** U-clips with low profile hex socket head jackscrews (removable).
 - D:** U-clips with low profile slot head jackscrews (removable).
 - M:** Low profile hex socket head jackscrews (removable).
 - N:** High profile hex socket head jackscrews (removable).
 - S:** Low profile slot head jackscrews (removable).
 - T:** High profile slot head jackscrews (removable).
 - P:** Jackposts (removable).

Micro-D connectors

PCB CONNECTORS OVERVIEW

AXON' Micro-D Printed Circuit Board connectors are designed for interconnection of PCB's inside-the-box to external cables.

AXON' Micro-D PCB connectors are available in two layouts (0.100" pitch and 0.075" pitch) and in two configurations (vertical mount and right angle mount connector) for flexible and rigid printed circuit boards.

NOTE: Typically, the PCB connector tends to be female, however male versions are equally available.

PCB CONNECTORS 0.100" PITCH

BS 0.100" Vertical mount

Available from 9 to 100 ways
Available in metal and plastic shell
PCB code: **BS**

Pages 98 & 100

BR 0.100" Right Angle mount

Available from 9 to 100 ways
Available in metal shell
PCB code: **BR**

Page 92

CBR 0.100" Condensed Right Angle mount

Available from 9 to 100 ways
Available in metal and plastic shell
PCB code: **CBR**

Pages 78 & 80

CBP 0.100" Condensed Right Angle mount low profile

Available from 9 to 51 ways
Available in metal and plastic shell
PCB code: **CBP**

Pages 86 & 88

PCB CONNECTORS 0.075" PITCH

BS 0.075" Vertical mount

Available from 9 to 100 ways
Available in metal and plastic shell
PCB code: **75SA / 75SB**

Pages 116 & 118

CBR 0.075" Condensed Right Angle mount

Available from 9 to 100 ways
Available in metal shell
PCB code: **75RB / 75RC**

Pages 106 & 112

PCB CONNECTOR VERSIONS

Differences in length and width

Example of the 51 way connectors

The main advantage of the Micro-D PCB connectors with a pitch of 0.075 inch in comparison to the 0.1 inch version is to save space on the PCB layout.

VERTICAL CONNECTOR

The 0.075" BS version has more or less the same width as the 0.100" BS version but is shorter in length.

RIGHT ANGLE CONNECTOR

The 0.100" CBR connector is a little wider, but substantially shorter than the 0.100" BR connector.

The 0.075" CBR connector is more or less the same length as the 0.100" CBR version, but is narrower in width in comparison to both the CBR and even the BR connectors in the 0.100" format.

SUMMARY OF CHARACTERISTICS

ELECTRICAL & MECHANICAL PERFORMANCE	
CURRENT RATING	3 A max.
CONTACT RESISTANCE	8 mΩ max.
INSULATION RESISTANCE	5000 MΩ min. @ 500 Vdc
DIELECTRIC WITHSTANDING VOLTAGE	Sea Level: 600 VAc Altitude 21 km (70,000 ft): 150 VAc

SUMMARY OF CHARACTERISTICS

ELECTRICAL & MECHANICAL PERFORMANCE	
CURRENT RATING	3 A max.
CONTACT RESISTANCE	8 mΩ max.
INSULATION RESISTANCE	5000 MΩ min. @ 500 Vdc
DIELECTRIC WITHSTANDING VOLTAGE	Sea level: 600 Vac
CONTACT ENGAGING FORCE	Altitude 21 km (70,000 ft): 150 Vac
CONTACT SEPARATING FORCE	170 g max. (6 oz)
CONTACT RETENTION	14 g min. (0.5 oz)
DURABILITY	2,26 kg (5 lbs)
VIBRATION	500 mating cycles min.
SHOCK	20g's - No discontinuity > 1μs
	50g's - No discontinuity > 1μs

MATERIAL & FINISH	
SHELL	Aluminium alloy 6061 or 300 series stainless steel, see ordering info for plating options
MOULDED INSULATOR	Liquid Crystal Polymer (LCP)
PIN CONTACT	Copper and beryllium copper, gold over nickel plating
SOCKET CONTACT	Copper alloy, gold over nickel plating
ENCAPSULENT	Epoxy resin
MOULDED TRAY	Liquid Crystal Polymer (LCP)
PCB TERMINALS	See ordering info for PCB terminals material
HARDWARE	300 series stainless steel, passivated

SEE PAGE 24 FOR MORE INFORMATION

PCB RECTANGULAR CONNECTORS

CBP TYPE LOW PROFILE CBR 0.100" PITCH

PLASTIC SHELL

- Low profile condensed board right angle connector for flexible and rigid printed circuit boards.
- Operating temperature: 150°C or 200°C.
- Several tail lengths available.

IDENTIFICATION CODE

MDA L 37 S CBP P G 3

SERIES

MDA: Micro-D AXON' standard series.

CONNECTOR TYPE

P: LCP shell + potting 150°C.

L: LCP shell + potting 200°C.

NUMBER OF CONTACTS

09, 15, 21, 25, 31, 37, 51.

See pages 26 & 27 for contact arrangements.

CONNECTOR GENDER

P: Male (pin contacts).

S: Female (socket contacts).

PCB VERSION

CBP: 0.100" Condensed Board Right Angle, low profile.

HARDWARE

B: Threaded holes for hardware (9 to 69 way: M2, 100 way: 4-40 UNC).

P: Jackposts.

Px (x: 1 to 5): Panel mount jackposts.

T: Threaded inserts installed.

W: Jackposts and threaded inserts installed.

Wx (x: 1 to 5): Panel mount jackposts and threaded inserts installed.

See pages 190 to 200 for hardware description.

CONDUCTOR TYPE

G: Gold plated solid conductor AWG 25.

T: Tin plated solid conductor AWG 24.

D: Flash gold plated solid conductor AWG 25.

See page 29 for conductor types.

TAIL LENGTH

1: 2.80 mm (0.110").

2: 3.80 mm (0.150").

3: 4.80 mm (0.190").

4: 6.35 mm (0.250").

5: 3.25 mm (0.127").

6: 3.56 mm (0.140").

7: 4.37 mm (0.172").

Tolerance: ± 0.38 mm (0.015").

Other lengths available on request.

DIMENSIONS

Dimensions are in millimetres (inches).

FEMALE connector

W: Jackposts and threaded inserts installed.

Wx (x: 1 to 5): Panel mount jackposts and threaded inserts installed.

See pages 190 to 200 for hardware description.

CONDUCTOR TYPE

G: Gold plated solid conductor AWG 25.

T: Tin plated solid conductor AWG 24.

D: Flash gold plated solid conductor AWG 25.

See page 29 for conductor types.

TAIL LENGTH

1: 2.80 mm (0.110").

2: 3.80 mm (0.150").

3: 4.80 mm (0.190").

4: 6.35 mm (0.250").

5: 3.25 mm (0.127").

6: 3.56 mm (0.140").

7: 4.37 mm (0.172").

Tolerance: ± 0.38 mm (0.015").

Other lengths available on request.

DIMENSIONS

Dimensions are in millimetres (inches).

SUMMARY OF CHARACTERISTICS

ELECTRICAL & MECHANICAL PERFORMANCE	
CURRENT RATING	3 A max.
CONTACT RESISTANCE	8 mΩ max.
INSULATION RESISTANCE	5000 MΩ min. @ 500 Vdc
DIELECTRIC WITHSTANDING VOLTAGE	Sea level: 600 Vac Altitude 21 km (70,000 ft): 150 Vac
CONTACT ENGAGING FORCE	170 g max. (6 oz)
CONTACT SEPARATING FORCE	14 g min. (0.5 oz)
CONTACT RETENTION	2.26 kg (5 lbs)
DURABILITY	500 mating cycles min.
VIBRATION	20g's – No discontinuity > 1 μs
SHOCK	50g's – No discontinuity > 1 μs

MATERIAL & FINISH	
MOULDED SHELL	Liquid Crystal Polymer (LCP)
PIN CONTACT	Copper and beryllium copper, Gold over nickel plating
SOCKET CONTACT	Copper alloy, gold over nickel plating
ENCAPSULANT	Epoxy resin
MOULDED TRAY	Liquid Crystal Polymer (LCP)
PCB TERMINALS	See ordering info for PCB terminals material
HARDWARE	300 series stainless steel, passivated

PCB RECTANGULAR CONNECTORS

CBR TYPE 0.075" PITCH

METAL SHELL

- Condensed board right angle connector for flexible and rigid printed circuit boards.
- Operating temperature: 150°C or 200°C.
- Several tail lengths available.

PLEASE CONTACT US FOR A PLASTIC VERSION OF 0.075" RIGHT ANGLE CONNECTOR.

IDENTIFICATION CODE

MDA 2 51 S 75RB P G 3

SERIES

MDA: Micro-D AXON' standard series.

CONNECTOR TYPE

- 1:** Cadmium al. shell / **Z:** Black zinc nickel aluminium shell + potting 150°C.
2: Nickel aluminium shell + potting 150°C.
3: Nickel aluminium shell + potting 200°C.
S: Passivated stainless steel shell + potting 200°C.

NUMBER OF CONTACTS

09, 15, 21, 25, 31, 37, 51DR, 51, 69, 100.
 See pages 26 & 27 for contact arrangements.

CONNECTOR GENDER

- P:** Male (pin contacts).
S: Female (socket contacts).

PCB VERSION

75RB: 0.075" pitch condensed board right angle specific layout.
 Other option available **75RC** see page 112.

HARDWARE

- B:** Threaded holes for hardware (9 to 69 way: M2, 100 way: 4-40 UNC).
P: Jackposts.
Px (x: 1 to 5): Panel mount jackposts.
T: Threaded inserts installed.
W: Jackposts and threaded inserts installed.
Wx (x: 1 to 5): Panel mount jackposts and threaded inserts installed.
 See pages 190 to 200 for hardware description.

CONDUCTOR TYPE

- G:** Gold plated solid conductor AWG 25.
T: Tin plated solid conductor AWG 24.
D: Flash gold plated solid conductor AWG 25.
 See page 29 for conductor types.

TAIL LENGTH

- 1:** 2.80 mm (0.110").
2: 3.80 mm (0.150").
3: 4.80 mm (0.190").
4: 6.35 mm (0.250").
5: 3.25 mm (0.127").
6: 3.56 mm (0.140").
7: 4.37 mm (0.172").

Tolerance: ± 0.38 mm (0.015").
 Other lengths available on request.

METAL CONNECTORS ARE SUPPLIED WITH ANTI-STATIC PROTECTIVE DUST CAPS

DIMENSIONS

Dimensions are in millimetres (inches).

FEMALE connector

PCB RECTANGULAR CONNECTORS

BS TYPE 0.075" PITCH

METAL SHELL

- Board straight connector for flexible and rigid printed circuit boards.
- Operating temperature: 150°C or 200°C.
- Several tail lengths available.

IDENTIFICATION CODE

MDA 2 37 S 75SB P G 3

SERIES

MDA: Micro-D AXON' standard series.

CONNECTOR TYPE

- 1:** Cadmium al. shell / **Z:** Black zinc nickel aluminium shell + potting 150°C.
2: Nickel aluminium shell + potting 150°C.
3: Nickel aluminium shell + potting 200°C.
S: Passivated stainless steel shell + potting 200°C.

NUMBER OF CONTACTS

09, 15, 21, 25, 31, 37, 51DR*, 51, 69*, 100.

***: 51DR & 69 ways are available for 75SB PCB version only**
See pages 26 & 27 for contact arrangements.

CONNECTOR GENDER

- P:** Male (pin contacts).
S: Female (socket contacts).

PCB VERSION

- 75SA:** 0.075" pitch board straight MIL standard layout.
75SB: 0.075" pitch board straight specific layout.

HARDWARE

- B:** No hardware.
P: Jackposts.
Px (x: 1 to 5): Panel mount jackposts.
T: Threaded inserts installed.
W: Jackposts and threaded inserts installed.
Wx (x: 1 to 5): Panel mount jackposts and threaded inserts installed.
See pages 190 to 200 for hardware description.

CONDUCTOR TYPE

- G:** Gold plated solid conductor AWG 25.
T: Tin plated solid conductor AWG 24.
D: Flash gold plated solid conductor AWG 25.
See page 29 for conductor types.

TAIL LENGTH

- 1:** 2.80 mm (0.110").
2: 3.80 mm (0.150").
3: 4.80 mm (0.190").
4: 6.35 mm (0.250").
5: 3.25 mm (0.127").
6: 3.56 mm (0.140").
7: 4.37 mm (0.172").

Tolerance: ± 0.38 mm (0.015").
Other lengths available on request.

METAL CONNECTORS ARE SUPPLIED WITH ANTI-STATIC PROTECTIVE DUST CAPS

DIMENSIONS

Dimensions are in millimetres (inches).

FEMALE connector

SUMMARY OF CHARACTERISTICS

ELECTRICAL & MECHANICAL PERFORMANCE	
CURRENT RATING	3 A max.
CONTACT RESISTANCE	8 m Ω max.
INSULATION RESISTANCE	5000 M Ω min. @ 500 V _{dc}
DIELECTRIC WITHSTANDING VOLTAGE	Sea level: 600 V _{ac} Altitude 21 km (70,000 ft): 150 V _{ac}
CONTACT ENGAGING FORCE	170 g max. (6 oz)
CONTACT SEPARATING FORCE	14 g min. (0.5 oz)
CONTACT RETENTION	2.26 kg (5 lbs)
DURABILITY	500 mating cycles min.
VIBRATION	20g's - No discontinuity > 1 μ s
SHOCK	50g's - No discontinuity > 1 μ s

MATERIAL & FINISH	
SHELL	Aluminium alloy 6061 or 300 series stainless steel, see ordering info for plating options
MOULDED INSULATOR	Liquid Crystal Polymer (LCP)
INTERFACIAL SEAL	Fluorosilicone rubber
PIN CONTACT	Copper and beryllium copper, gold over nickel plating
SOCKET CONTACT	Copper alloy, gold over nickel plating
ENCAPSULANT	Epoxy resin
MOULDED TRAY	Liquid Crystal Polymer (LCP)
PCB TERMINALS	See ordering info for PCB terminals material
HARDWARE	300 series stainless steel, passivated

SEE PAGE 24 FOR MORE INFORMATION

PCB RECTANGULAR CONNECTORS

BS TYPE 0.075" PITCH

PLASTIC SHELL

- Board straight connector for flexible and rigid printed circuit boards.
- Operating temperature: 150°C or 200°C.
- Several tail lengths available.

IDENTIFICATION CODE

SERIES

MDA: Micro-D AXON' standard series.

SHELL TYPE

P: LCP shell + potting 150°C.
L: LCP shell + potting 200°C.

NUMBER OF CONTACTS

09, 15, 21, 25, 31, 37, 51.
See pages 26 & 27 for contact arrangements.

CONNECTOR GENDER

P: Male (pin contacts).
S: Female (socket contacts).

PCB VERSION

75SA: 0.075" pitch board straight MIL standard layout.
75SB: 0.075" pitch board straight specific layout.

HARDWARE

B: No hardware.
P: Jackposts.
Px (x: 1 to 5): Panel mount jackposts.
T: Threaded inserts installed.
W: Jackposts and threaded inserts installed.
Wx (x: 1 to 5): Panel mount jackposts and threaded inserts installed.
See pages 190 to 200 for hardware description.

CONDUCTOR TYPE

G: Gold plated solid conductor AWG 25.
T: Tin plated solid conductor AWG 24.
D: Flash gold plated solid conductor AWG 25.
See page 29 for conductor types.

TAIL LENGTH

1: 2.80 mm (0.110").
2: 3.80 mm (0.150").
3: 4.80 mm (0.190").
4: 6.35 mm (0.250").
5: 3.25 mm (0.127").
6: 3.56 mm (0.140").
7: 4.37 mm (0.172").

Tolerance: ± 0.38 mm (0.015").
Other lengths available on request.

DIMENSIONS

Dimensions are in millimetres (inches).

FEMALE connector

9– 51 contacts:
Ø2.24/2.44 (.088/.096) or THD insert 2–56 UNC 2B

CONNECTOR SAVERS

CONNECTOR SAVER ONE PIECE DESIGN

METAL OR PLASTIC SHELL

- One piece design version L = 10 mm (.394") between flanges.
- Ideal for applications requiring many mating / demating cycles.
- Reduces wear and tear on systems and test equipment.
- Operating temperature: 150°C or 200°C.

IDENTIFICATION CODE

MDA 2 51 CS 1 B

SERIES

MDA: Micro-D AXON' standard series.

CONNECTOR TYPE

P: LCP shell + potting 150°C.

L: LCP shell + potting 200°C.

1: Cadmium al. shell / **Z:** Black zinc nickel aluminium shell + potting 150°C.

2: Nickel aluminium shell + potting 150°C.

3: Nickel aluminium shell + potting 200°C.

S: Passivated stainless steel shell + potting 200°C.

NUMBER OF CONTACTS

09, 15, 21, 25, 31, 37, 51DR*, 51, 69*, 100*.

*: 51DR, 69 & 100 way only available for 1, Z, 2, 3 & S connector types.

See pages 26 & 27 for contact arrangements.

PRODUCT TYPE

CS: Connector saver (plug to receptacle connector).

ONE PIECE DESIGN ASSEMBLY

1: One piece design assembly.

L = 10 mm (.394").

HARDWARE

B: No hardware.

P1: Removable long jackposts on the female connector.

P2: Removable long jackposts on the male connector.

HARDWARE P1 TYPE

HARDWARE P2 TYPE

METAL CONNECTORS ARE SUPPLIED WITH ANTI-STATIC PROTECTIVE DUST CAPS

CONNECTOR SAVERS

CONNECTOR SAVER

ONE PIECE DESIGN

L = 10 (.394)

LOW PROFILE METAL SHELL

- One piece design version L = 10 mm (.394") between flanges.
- Ideal for applications requiring many mating / demating cycles.
 - Reduces wear and tear on systems and test equipment.
 - Operating temperature: 150°C or 200°C.

IDENTIFICATION CODE

SERIES

- S:** Low profile slot head jackscrews (removable).
- T:** High profile slot head jackscrews (removable).

See pages 190 to 200 for hardware description.

2nd CONNECTOR HARDWARE

(For CS 1st connector is the female one).

See 1st connector hardware for the list of choices.

Other hardware available on request

MICROSTRIP CONNECTORS

PIGTAIL & SOLDER CUP ASSEMBLIES

1.27 mm (0.050") PITCH

- Single row plastic connector for space and weight saving applications.
- Guide pin(s) or latch(es) available on female connector (blank cavity(ies) or latch box(es) on male connector).

IDENTIFICATION CODE

SERIES

MSA: Micro Strip AXON® standard series.

STRIP TYPE

P: LCP shell + potting 150°C.
L: LCP shell + potting 200°C.

NUMBER OF ROWS: 1.

NUMBER OF ELECTRICAL CAVITIES: 02 TO 40.

Mechanical cavities are used for polarization, must not be counted here but can reduce the maximum number of available electrical cavities (see page 134).

CONNECTOR GENDER

P: Male (pin contacts).
S: Female (socket contacts).

MOUNTING HOLE OPTION

A: With mounting holes.
B: No mounting holes.

TERMINATION / WIRE TYPE

For colour code **V** only

3: M22759/11, AWG26. 19 strands, 600V.

F: E2607, AWG26, 7 strands, 600V.

Solid uninsulated wires

G: AWG 25 gold plated.

T: AWG 24 tin plated.

FS: Solder cup.

See page 29 for wire types.

COLOUR CODE

F: All yellow.

L: All white.

V: MIL-STD-681 striped (for wire types 3 and F only). See page 30 for colour code.

WIRE LENGTH (in cm)

BLANK: if wire type is **FS**

Attention! Wire length in centimetres (1cm = 10 mm = .394").

POLARIZATION

Blank: None.

G2E: Guide pin / guide hole both ends.

GCE: Guide pin / guide hole centered.

GXX: Guide pin / guide hole in xx position.

L2E: Latch spring / latch box both ends.

LCE: Latch spring / latch box centered.

LXX: Latch spring / latch box in xx position.

	L	5 ≤ L ≤ 10	10 < L ≤ 100	L > 100
in cm (inches)	1.97 ≤ L ≤ 3.940	3.940 < L ≤ 39.40	L > 39.40	
TOLERANCE	-0 / +0.5	-0 / +3	-0 / +5	
in cm (inches)	-0 / +0.200	-0 / +1.180	-0 / +1.970	

IF NEEDED, YOU CAN COMBINE SEVERAL HARDWARE OPTIONS

EXAMPLES:

- 2 GUIDE-PINS OR LATCH-SPRINGS AT 2 PARTICULAR POSITIONS: MSAP109SB4L025 **G02 G08** (OR **L02 L08**)
- 1 GUIDE-HOLE CENTERED + 1 LATCH-BOX AT A PARTICULAR POSITION: MSAP112PAR2T3 **GCE L07**
- 1 GUIDE-PIN CENTERED + LATCH-SPRINGS BOTH ENDS: MSAL117SACF012 **GCE L2E**

ONLY 2 RULES TO BUILD YOUR P/N:

- DEFINE ALL GUIDE PIN CODES FIRST, FOLLOWED BY LATCH CODES
- DEFINE STANDARD CODES (G2E / GCE / L2E / LCE) FIRST, FOLLOWED BY SPECIFIC POSITION CODES (GXX / LXX) AFTERWARDS

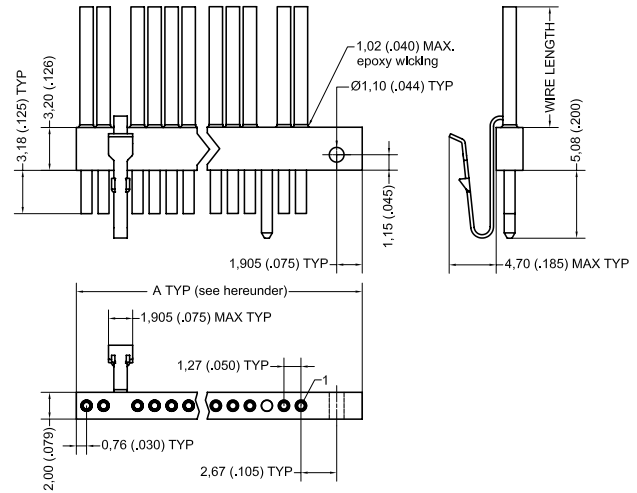

DIMENSIONS

Dimensions are in millimetres (inches).

MALE MICRO STRIP CONNECTOR

FEMALE MICRO STRIP CONNECTOR

TO DETERMINE CONNECTOR WIDTH A ± 0.3 mm (.012")

	EXAMPLE: 11 CAVITY STRIP WITH MOUNTING HOLES
MULTIPLY the number of mechanical cavities in one row by 1.27 mm (.050")	11 x 1.27 = 13.97
ADD 0.25 mm (.010")	+ 0.25 = 14.22
ADD 7.62 mm (.300") if mounting hole option is selected	+ 7.62 = 21.84

- For detailed information concerning microstrip connectors, see pages 134 to 136.

SUMMARY OF CHARACTERISTICS

ELECTRICAL & MECHANICAL PERFORMANCE		MATERIAL & FINISH	
CURRENT RATING	3 A max.	SHELL	Liquid Crystal Polymer (LCP)
CONTACT RESISTANCE	8 mΩ max.	PIN CONTACT	Copper and Beryllium copper, gold over nickel plating
INSULATION RESISTANCE	5000 MΩ min. @ 500 V _{DC}	SOCKET CONTACT	Copper alloy, gold over nickel plating
DIELECTRIC WITHSTANDING VOLTAGE	Sea level: 600 V _{AC} Altitude 21 km (70,000 ft):150 V _{AC}	ENCAPSULANT	Epoxy resin
CONTACT ENGAGING FORCE	170 g max. (6 oz)	GUIDE PIN	300 series stainless steel, passivated
CONTACT SEPARATING FORCE	14 g min. (0.5 oz)	LATCH	Beryllium copper, nickel plating
CONTACT RETENTION	2.26 kg (5 lbs)		
DURABILITY	500 mating cycles min.		

SEE PAGE 24 FOR MORE INFORMATION

Micro-D connectors

MICROSTRIP GENERAL INFORMATION

► All cavities used, whether for electrical (pin or socket) contacts or for hardware options, (guide pin or latch) are considered as mechanical positions.

- G2E & L2E: 2 mechanical positions to count.
- GCE & LCE: 1 mechanical position to count.
- Gxx & Lxx: 1 mechanical position to count for each occurrence.

NB: If G2E or L2E are chosen, first and last cavities cannot be used for another polarization option (ex: if L2E is chosen, guide pin in position 1 is not possible)

► When specifying the number of ways, only electrical positions (cavities containing pin or socket contacts) are counted.

Example: a 7 way strip with 2 latches at the end and a guide pin would have 10 mechanical positions, but would still be called a 7 way connector.

TO DETERMINE CONNECTOR WIDTH A ± 0.3 mm (.012")

	EXAMPLE: 11 CAVITY STRIP WITH MOUNTING HOLES
MULTIPLY the number of mechanical cavities in one row by 1.27 mm (.050")	11 x 1.27 = 13.97
ADD 0.25 mm (.010")	+ 0.25 = 14.22
ADD 7.62 mm (.300") if mounting hole option is selected	+ 7.62 = 21.84

► To determine hardware location number for centered hardware (GCE / LCE):

- Divide the total number of mechanical cavities by two.
- Round to the next whole number if result is a fraction.

LATCH BOX WITH FILLED CAVITY

$$\frac{6}{2} = 3$$

> HARDWARE IN CAVITY N°3

LATCH BOX WITH FILLED CAVITY

$$\frac{7}{2} = 3.5$$

> HARDWARE IN CAVITY N°4

► Hardware options

POLARIZATION BY GUIDE PIN

The guide pin is inserted into the female connector, and there is a guide hole in the opposite cavity in the male connector.

LATCHED RETENTION

The latch spring is mounted on the female connector, with the corresponding latch box installed on the male connector. When the first and/or last mechanical positions are chosen for the latches they will be mounted on the connector edges, making the connector wider but not longer. For all other positions the latches will be mounted on top of the connector, directly above the corresponding mechanical position. Wherever a latch is fitted the corresponding cavity will be filled, and therefore mechanical only in function.

EXAMPLES

MOUNTING HOLES OPTION

► Position of holes

► Special case: mounting holes + hardware

When mounting holes are selected, first and last mechanical cavities are "after the holes area".

EXAMPLE WITH **GUIDE PIN**

Hardware code G2E

Guide pin / guide holes to be in first and last mechanical cavities.

EXAMPLE WITH **LATCHING**

Hardware code L2E

Latch spring / latch box to be above first and last mechanical cavities, not on the edges of the strip.

High density connectors

HIGH DENSITY CONNECTORS

NANO-D PITCH

As the need for increased miniaturisation is becoming even greater, AXON' has developed an ultra-high density solution within the existing micro connector size. By putting nano contacts and nano pitch spacing into an existing micro shell, extremely compact connectors with very high pin counts can be produced in circular, rectangular, plastic and metal forms.

Optimal cabling density is achieved in a rectangular ultra high density connector made with Nano-D contacts and spacing inside a standard Micro-D shell. Such a connector can accommodate a very large amount of pins while retaining excellent Micro-D reliability.

Most electrical and environmental performances are comparable to those of standard Nano-D connectors (250 V_{AC}, 200°C), combined with the robustness and shielding efficiency of the Micro-D metal shell which is compatible with all the hardware types available for Micro-D pigtailed.

This same process can be applied to most of the standard and special Micro-D range, making it possible to have ultra high density versions of PCB connectors, wide flange versions, circular, rectangular and combo style versions with a mix of Micro-D and Nano-D contacts.

▲ RECTANGULAR HIGH DENSITY MICRO-D CONNECTORS

► High density range

All versions are available with 28, 52 or 86 contacts.

Please find detailed information about this product range in the Nano-D chapter of the catalogue (page 282)

MICRO-D CONNECTORS

Continuous miniaturisation in electronics makes it ever more challenging to route power and RF signals through very small connectors.

The ideal solution is the AXON' Combo Micro-D. These special, hybrid connectors accommodate a mixture of power and coaxial cables, along with regular signal wires, all in one compact body.

They are available in 2 types and 3 different styles.

► PCB connectors

► BS TYPE

- Board Straight connector for flexible and rigid printed circuit boards,
- Various tail lengths available.

► CBR TYPE

- Condensed Board Right angle connector for flexible and rigid printed circuit boards,
- Various tail lengths available.

► Pigtail connectors

- With coaxial cables (different types and sizes available),
- Connectors are backpotted to protect contacts,
- A mixed arrangement with coaxial and power cables is also possible.

▲ COMBO MICRO-D
WITH Ø2.2MM CONTACT

▲ COMBO MICRO-D WITH
Ø3MM CONTACT

CONTACT ARRANGEMENTS

Combo Micro-D connectors use two types of contacts in two sizes:

- 2.2 mm and 3 mm diameter coaxial contacts.
- 2.2 mm and 3 mm diameter power contacts.

Arrangements can vary depending on the number and the size of the coaxial, power and signal contacts.

AXON' standard combo Micro-D connectors are available with four different mating faces.

COMBO Micro-D
connectorsCOAXIAL & POWER CONTACTS
& CABLES

AXON' uses micro-miniature high frequency and high power contacts to provide the optimum performance within the smallest available space. Two contacts sizes are available: 2.2 mm and 3.0 mm.

AXON' also offers coaxial contacts in 2 different impedances - 50Ω and 75Ω - and power contacts in different current ratings, from 5A to 20A.

Their characteristics are detailed below:

COAXIAL CONTACTS					
CONTACT TYPE mm (inch)	MEDIA	CONTACT IMPEDANCE	INSULATION RESISTANCE (contacts only)	SWR (contacts only) (Standing Wave Ratio)	FREQUENCY (max.) (for the final assembly)
∅ 3.00 0.118	PCB	50 Ω AND 75 Ω	10 ⁶ MΩ / 250 V _{RMS} (*)	< 1.05 + 0.04 F (GHz) (*)	3 GHz
∅ 3.00 0.118	Coaxial cable	50 Ω AND 75 Ω	10 ⁶ MΩ / 250 V _{RMS}	< 1.05 + 0.04 F (GHz)	6 GHz (depending on cable)
∅ 2.20 0.086	PCB	50 Ω	10 ⁶ MΩ / 250 V _{RMS} (*)	< 1.05 + 0.04 F (GHz) (*)	1 GHz
∅ 2.20 0.086 (*)	Coaxial cable	50 Ω	10 ⁶ MΩ / 250 V _{RMS}	< 1.05 + 0.04 F (GHz)	3 GHz (depending on cable)

(*)The above values depend on the impedance of the PCB the connector is connected to.

COMBO Micro-D
connectors

SPECIAL COMBO CONNECTORS

AXON' can develop on request special Combo Micro-D connectors based on all the standard shell sizes from 9 to 100 ways, or based on special shells such as the 120 way version or other custom configurations.

Combo Micro-D connectors can be offered as pigtails, as part of a complex harness or as PCB connectors, in either straight (BS style) or right angle versions (BR and CBR styles).

Some examples of special designs:

► Other possible arrangements

25 WAY

2 COMBO CONTACTS SIZE 2.2 mm + 9 SIGNALS

100 WAY

4 COMBO CONTACTS SIZE 3 mm + 20 SIGNALS

Micro-D connectors

Custom designed solutions

INTRODUCTION TO HERMETIC CONNECTORS

Hermetic connectors are used in applications where an enclosure needs to be isolated from the outside environment. Panel feed through is the main application for this type of connector.

In the vast majority of applications, the use of a hermetic encapsulant offers sufficient levels of hermeticity at a reasonable price. Only extreme environments require glass-ceramic-to-metal sealed HermAx® connectors.

Furthermore, AXON' fully tests its hermetic Micro-D solutions to provide reliability and satisfaction to its customers. Helium leak rate is the most common and most reliable method to quantify a small leak.

Based on its expertise, AXON' can also design tailor-made connectors to fit your application needs.

	STANDARD MICRO-D MIL-DTL-83513	WATERPROOF ENCAPSULANT	AXON' HERMETIC ENCAPSULANT	HERMAX®	LEVEL OF HERMETICITY

TECHNOLOGY CODE	HERMETIC ENCAPSULANT WITH SILICONE GASKET MDH1	HERMETIC ENCAPSULANT WITH FKM GASKET MDH2	HERMAX® See HermAx® catalogue
HELIUM LEAK RATE (MBAR.L/S) MIL-STD-883 A4	1.10 ⁻⁵ mbar.l.s ⁻¹	1.10 ⁻⁸ mbar.l.s ⁻¹	1.10 ⁻⁹ mbar.l.s ⁻¹ *
SERVICE TEMPERATURE RANGE	-55°C / +125°C	-30°C / +125°C	UP TO -55°C / +200°C**
CURRENT RATING	3 A MAX	3 A MAX	3 A MAX

*: Lower leak rates available on demand.

**: Maximum temperature range, depending on connector type.

Other type of seals can also be offered

By mounting the flange to the panel, all AXON' hermetic Micro-D connectors can be used to maintain low or high pressure vacuum seals.

They are fully compatible with standard Micro-D connectors. A wide range of products is already available however custom interconnect solutions can be designed for specific panel cut-outs and thicknesses. Please contact us for any specific hermetic applications.

For extreme conditions please, ask for our HermAx® catalogue.

REAR PANEL MOUNTING GUIDE

HERMETIC FEED THROUGH CONNECTORS

Micro-D hermetic feed through is only available as rear panel mount connectors. Specific jackposts are used to secure the feed through on the panel.

- Recommended Ra for panel surface: $<0.8 \mu\text{m}$
- Recommended torque (jackposts): 0.35 N.m
- Connector parts and panel must be cleaned off before mounting for better performances
- Design is made to be used without vacuum grease

RECTANGULAR CONNECTORS

HERMETIC
CONNECTOR

METAL SHELL

- High performance hermetic metal connector and PTFE wire.
- Male Twist Pin or female connector.
- 9 to 100 contacts.
- According to MIL-DTL-83513.

NON-MAGNETIC MICRO-D INTERCONNECT SOLUTIONS

▲ **FIGURE 1:** Location of magnetic test facility (30m away from possible interference)

▲ **FIGURE 2:** This item's initial magnetic state is being measured using a three-axis probe, whilst protected by the magnetic shield

▲ **FIGURE 3:** Diagram showing the effect of the magnetic shield on the Earth's magnetic field. In white, the magnetic field lines. In color, the intensity of the magnetic field within the shield, red for high intensity and blue for low intensity. The black area in the center is the area used to measure the initial magnetic state of the item.

Interest in powerful magnetic fields and accurate magnetic sensors has significantly increased in high-tech industries over the past decades. Various applications (MRI, low magnetic field detection systems, etc...) now use these complex phenomena, but accurately measuring a magnetic field is challenging. The difficulty comes mainly from interference caused by any ferromagnetic material surrounding the probes.

At the same time, systems using such magnetic fields are spreading and components tend to be closer to each other, further increasing magnetic interference.

A standard Micro-D connector made to the requirements of MIL-DTL-83513 contains materials such as austenitic stainless steel, which can easily be magnetized. To avoid interference from interconnects, AXON' has developed a new product range: non-magnetic Micro-D connectors.

These connectors have limited or no influence on magnetic field lines, improving the reliability of magnetic measurements, even down to nanoTesla level, 10^{-4} times lower than the Earth's magnetic field. AXON's non-magnetic Micro-D connectors have been designed using new materials and surface treatments, avoiding ferromagnetic materials. The manufacturing process has also been developed to keep them "as clean as possible" magnetically.

► MAGNETIC TESTING

In order to further enhance and test its non-magnetic product range, AXON' has developed its own test equipment and procedure, based on recognized standards, to characterize and quantify the magnetic influence of connectors on their environment.

The first step is to measure the initial magnetic state of the Unit Under Test (UUT) using a three-axis probe. Then a high magnetic field of 0.5T (Earth's magnetic field is about $50\mu\text{T}$ in Europe), is applied to the UUT.

Finally, the intensity of the field is gradually decreased to nil, and the residual magnetism level of the UUT is measured with the three-axis probe. As a result of this procedure, the influence of a strong magnetic field on the UUT is known.

To minimize the possibility of magnetic interference from the surrounding area, the tests are carried out in a specially-constructed facility (see figure 1) which is made from magnetically neutral materials. Additionally a magnetic shield is used to shield the item tested from the Earth's magnetic field (see figures 2 & 3).

NON-MAGNETIC MICRO-D INTERCONNECT SOLUTIONS

For a material studied in a magnetostatic state, a link between the physical quantities of the Maxwell's equations can be simplified to:

$$B = \mu_0 (H+M)$$

Where B is the magnetic flux density generated by the material in Tesla (T),
 μ_0 is the magnetic permeability of vacuum in Henry per meter (H/m),
 H is the magnetic field intensity generated by the environment in Ampere per meter (A/m),
 M is the sum of the magnetic moments of the material or magnetization in Ampere per meter (A/m).

If the item is perfectly non-magnetic, $M = 0$. So if the magnetic field generated by the environment is also nil ($H = 0$), the measured magnetic flux density B is also nil.

Relationship between physical quantities commonly used:

$$1 \text{ Oersted} = \left(\frac{10^3}{4\pi}\right) \text{ A/m}$$

$$1 \text{ T} = 10^4 \text{ Gauss} = 10^9 \text{ Gamma}$$

GENERAL PERFORMANCES

Residual Magnetic Level	NMB*: ≤ 200 nT residual magnetism level NMC*: ≤ 20 nT residual magnetism level NMD* on request: ≤ 2 nT residual magnetism level
Operating temperature range	-55°C / +200°C
Current rating	3 A max

*: NMB, NMC & NMD levels are defined by NASA GSFC S-311 for non-magnetic subminiature connectors and adapted to the dimensions of microminiature connectors.

MATERIAL & FINISH

SHELL	Aluminium alloy 6061 with custom non-magnetic plating or titanium
MOULDED INSULATOR	Liquid Crystal Polymer (LCP)
INTERFACIAL SEAL	Fluorosilicone rubber
PIN CONTACT	Copper and beryllium copper, gold over nickel plating (custom non-magnetic plating)
SOCKET CONTACT	Copper alloy, gold over nickel plating (custom non-magnetic plating)
ENCAPSULANT	Epoxy resin

PCB CONNECTORS OVERVIEW

AXON' Micro-D Printed Circuit Board connectors are designed for interconnection of PCB's inside-the-box to external cables.
AXON' Micro-D PCB connectors are available in two layouts (0.100" pitch and 0.075" pitch) and in two configurations (vertical mount and right angle mount connectors) for flexible and rigid printed circuit boards.

NOTE: typically, the PCB connector tends to be female, however male versions are equally available.

NON-MAGNETIC PCB CONNECTORS 0.100" PITCH

CBR 0.100" Condensed Right Angle mount

Available from 9 to 100 ways
Available in metal shell
PCB code: **CBR**

See pages 78 to 85*.

CBP 0.100" Condensed Right Angle mount low profile

Available from 9 to 51 ways
Available in metal and plastic shell
PCB code: **CBP**

See pages 86 to 91*.

NON-MAGNETIC PCB CONNECTORS 0.075" PITCH

BS 0.075" Vertical mount

Available from 9 to 100 ways
Available in metal and plastic shell
PCB code: **75SB**

See pages 116 to 125*.

CBR 0.075" Condensed Right Angle mount

Available from 9 to 100 ways
Available in metal shell
PCB code: **75RB**

See pages 106 to 111*.

*: Non-magnetic PCB connectors have the same dimensions and PCB layouts as standard PCB connectors.
Construction of the references on the next page.

NON-MAGNETIC PCB CONNECTOR

- For strong magnetic field environments.
 - Minimal magnetic disturbance.
- Condensed board right angle connector for flexible and rigid printed circuit boards.
 - Operating temperature: 125 or 200°C.
 - Several tail lengths available.
- 9 to 100 contacts (up to 51 for plastic connectors).

Micro-D connectors

120 WAY MICRO-D CONNECTORS

An enduring trend in the electronics industry is the continuing drive towards miniaturisation. This leads in turn to ever greater cabling densities with an ever larger number of signals required within limited space constraints. In answer to these challenges, AXON' CABLE has developed a range of 120 way Micro-D connectors. They are available as pigtailed or within assemblies but can equally be supplied as PCB connectors in either surface mount or through hole format. Connector savers are part of the range.

These connectors can be used for any applications where severe environmental conditions and high density cabling are critical. Keying hardware is an option.

AXON' can offer specific numbers of contacts for custom designed applications. Specific designs are not contained within the MIL specification but AXON's solutions remain fully compatible with the MIL-DTL-83513 standard as far as performance and construction are concerned.

HARDWARE	STAINLESS STEEL, 300 SERIES	PASSIVATION IN ACCORDANCE WITH SAE-AMS2700
ENCAPSULANT	EPOXY RESIN	
UNINSULATED WIRE	AWG 2801 SOLID COPPER WIRE	GOLD PLATED IN ACCORDANCE WITH A-A-59551

► Surface Mount PCB Card Edge Connectors

Surface Mount (SMT) connectors have two rows of 28 AWG gold plated leads at 0.635 mm (.025") pitch spacing to terminate to PCB's by soldering. Lugs on either side of the connector allow for mechanical clamping onto the PCB.

► AVAILABLE VERSIONS

- Female style to mate with a male pigtail or assembly connector.
- Male and female styles to mate together (this option has a longer shell to retain the keying hardware system).
- Female style for panel mount.

► FEMALE SMT

to mate to a male cable connector.

P562622

mm (inch)

SEE CONTACT LAYOUT ON PCB PAGE 306

► BS Connector

The BS version is similar to the straight PCB connector style of the MIL standard. Available in male version only.

P562623

SEE CONTACT LAYOUT ON PCB PAGE 306

► Connector saver

Connector savers have been developed to protect expensive equipment. Typical applications include test equipment and space-grade instruments.

AXOCLAMP® EMI BAND TERMINATION

Material: Stainless steel 300 series.

360° shield termination for connectors can be carried out with a patented metal band called AXOCLAMP®. This ensures the continuity of shielding efficiency at the cable / connector junction.

IDENTIFICATION CODE

AXCL	01
AXOCLAMP®	BAND TYPES 01: standard 03: microband double wrapped

The standard version is coiled but straight AXOCLAMP® can be delivered on request (reference example AXCL03D). Minimum quantity: 100 pieces per reference.

DIMENSIONS

Dimensions are in millimetres (inches).

MICRO-D & NANO-D ASSEMBLY KIT

Installation, maintenance and general handling of miniature connectors integrated within your system requires specific tooling and operating procedures. AXON' offers 2 toolboxes with all the proper tools and instructions on how to safely handle Micro-D & Nano-D connectors. These toolboxes greatly simplify connector handling, thus aiding correct installation. This will guarantee the connector's performance in terms of signal and power transmission, and of product life.

► Characteristics

- Assembly kits consisting of universal tools for the assembly of rectangular Micro-D & Nano-D connectors and the majority of custom-designed connectors.
- Easy-to-mount components in any situation.
- Both toolboxes delivered with mounting / dismounting procedures: short instructions and a demonstration video (CD).
- Dedicated tooling with torque values as defined in the MIL-DTL-83513 & MIL-DTL-32139 standards: optimisation of fastener / hardware performance and enhanced connection reliability.
- Each assembly kit is equipped with a screwdriver with dedicated torque range. Our whole line of miniature connectors is covered by both screwdrivers. See table hereafter.

▲ MICRO-D ASSEMBLY KIT COMPACT AND LIGHTWEIGHT PACKAGE:
DIMENSIONS 270 x 230 x 80 mm (10.6" x 9" x 3.1") FOR A WEIGHT OF 750g (1.7 lb)

ITEM	MICRO-D KIT (P541268) for Micro-D connectors (9 to 120 way)	MICRO-D / NANO-D KIT (P536692) for Nano-D connectors & Micro-D connectors (9 to 69 way)
1	Torque screwdriver	Torque screwdriver
2	3/16" spanner	0.050" bit for hex screw
3	5/32" spanner	1/16" bit for hex screw
4	1/8" spanner	5/32" spanner
5	Bit for slotted head screw	1/8" spanner
6	0.050" bit for hex screw	1/8" Socket
7	1/16" bit for hex screw	Bit for slotted head screw
8	5/64" bit for hex screw	Insertion tool
9	1/8" socket	Socket adaptor
10	3/16" socket	
11	100-way de-mating tool

EXPERTISE IN SPACE

Lightweight, miniature, reliable and highly resistant to cosmic radiation and high temperatures: these are the qualities of wires, cables, cable assemblies, wire harnesses and connectors offered by AXON' for space applications. The scope of products and services offered by the company is extensive:

- ESA wires for spacecraft cabling
- Cable assemblies & harnesses terminated with various connector styles
- MIL-STD-1553 bus harnesses for data transmission
- High data rate assemblies including SpaceWire and very high speed links up to 10 Gb/s
- Microwave coaxial assemblies up to 50 GHz
- Bur bars for power distribution in spacecraft
- Numerous accessories including halorings, EMC banding adaptors and backshells
- Bespoke interconnect solutions
- Cable and interconnect engineering services

In addition to this large range of products, AXON' CABLE has developed miniature Micro-D connectors and Nano-D connectors designed to meet the most severe challenges of space:

- Miniature Micro-D connectors
 - 1.27 mm (0.050") contact spacing,
 - Weight and space saving solution,
 - Qualified to ESCC 3401/029 (ESCC 3401/091 for D-Click® fast-latching connectors),
 - Custom design.
- Miniature Nano-D connectors
 - 0.635 mm (0.025") contact spacing,
 - Extreme miniaturization,
 - ESCC 3401/086 EPPL2.

► Flight heritage

Involved in numerous space projects in orbit and beyond for over 20 years, AXON' CABLE has a wealth of experience in designing and manufacturing interconnect solutions able to withstand the stresses of launch and the harsh space environment. Rocket launchers, ISS, Mars rovers, LEO and GEO satellites, manned and unmanned flights, thrusters, space research and experimental equipment are just a few examples.

Space programmes with AXON' on-board include Ariane, Alphabus, Curiosity, Bepi Colombo, Corot, Eurostar, Exomars, Gaia, Galileo, Globalstar, Insight, Iridium, Mangalayyan, Maven, O3B, Sentinel, Spacebus, Vega.

MICRO-D FOR SPACE APPLICATIONS

Space Micro-D & Nano-D connectors

MDSA RANGE

► Micro-D connectors and assemblies for space applications

AXON' has drawn upon long experience in the highly challenging environment of space electronics to develop Micro-D connectors and assemblies suitable for this demanding area. Marrying the Micro-D design with the need to be able to reliably transmit signals, power and high speed data, AXON' has developed custom solutions for a wide variety of applications in space.

AXON' space products are assembled to the highest standards, meeting the ECSS-Q-ST-70-08C and ECSS-Q-ST-70-26C requirements, and all such products are built in one of our humidity controlled, class 100,000 (ISO 8) clean rooms.

AXON' has been qualified to ESCC 3401/029 since 2021.

120 WAY MICRO-D
CONNECTORS

Space Micro-D &
Nano-D connectors

120 WAY MICRO-D CONNECTORS

An enduring trend in the electronics industry is the continuing drive towards miniaturisation. This leads in turn to ever greater cabling densities with an ever larger number of signals required within limited space constraints. In answer to these challenges, AXON' CABLE has developed a range of 120 way Micro-D connectors. They are available as pigtailed or within assemblies but can equally be supplied as PCB connectors in either surface mount or through hole format. Connector savers are part of the range.

These connectors have been developed and tested for the challenging requirements of space electronics, and can be used for any applications where severe environmental conditions and high density cabling are critical. Keying hardware is an option.

AXON' can offer specific numbers of contacts for custom designed applications. Specific designs are not contained within the MIL specification but AXON's solutions remain fully compatible with the MIL-DTL-83513 standard as far as performance and construction are concerned.

► 120 way male and female connectors for cable and harnesses

Both male and female connectors can be assembled with various wire sizes in shielded and unshielded forms. High speed variants can also be produced, using controlled impedance shielded twisted pairs which allow data rates of up to 880 Mbps. For space applications, these connectors are assembled in a class 100,000 clean room, and can be terminated with ESA ESCC (European Space Agency) approved wires.

120 WAY MICRO-D
CONNECTORS

Space Micro-D &
Nano-D connectors

► Surface Mount PCB Card Edge Connectors

Surface Mount (SMT) connectors have two rows of 28 AWG gold plated leads at 0.635 mm (.025") pitch spacing to terminate to PCB's by soldering. Lugs on either side of the connector allow for mechanical clamping onto the PCB.

► AVAILABLE VERSIONS

- Female style to mate with a male pigtail or assembly connector.
- Male and female styles to mate together (this option has a longer shell to retain the keying hardware system).
- Female style for panel mount.

► FEMALE SMT

to mate to a male cable connector.
